About me: as a fresh software tester I'm seeking for the opportunity to gain experience in manual testing and to be a part of a team that can improve the quality of the product that provides the good reputation to the company. I'm motivated to know more about the different business and to contribute the success of the SDLC process.

• Technical skills

- Reading and understanding test basis like requirements, coding, business diagram and user story.
- Writing and executing test case.
- Reviewing the different functional areas across the project to assure their alignment with the business objectives.
- Working with other development teams to design and implement changes to improve the quality.

• Courses and certifications

- Practical manual testing course. May 2024.
By: SWQ Academy
- API testing with postman. January 2025.
By: QACart platform
- ISTQB foundation level. January 2025.
By: QACart platform

• Projects

1. Daftra: ERP system tested core functionalities of the business. Writing test cases with azure dev ops to test the inventory section and to test the invoice with decision table technique.
2. Dubarter: e-commerce website verified functionality and user workflows for the online marketplace, identifying and reporting critical bugs with Jira tools.
3. Tabibi: healthcare platform conducted test case for registration page.

• Key skills

- Understanding the SDLC and STLC.
- Knowledge of manual testing.
- Report test case and bug with ALM tools (Jira, Azure dev ops)
- API testing with Postman.
- Basic programming language: Java, c and XML - JSON.

- **Soft skills**

- Communication skills- critical thinking - problem solving.

- **Languages**

- Arabic: native
- English: good

- **Personal information**

- Graduated in faculty of arts - Ain shams university May 2020.
- Military Status: completed.
